Guided Success in Project Performance Management – Distributive Management and Cask Technologies Join Forces

Fredericksburg, VA, August 12, 2010 – Distributive Management, measurement experts and a leading provider of metrics dashboard software for software, systems and IT organizations, today announced it has finalized its technology partnership with Cask Technologies. Cask Technologies, LLC (“Cask”) is a woman-owned, SBA 8(a)-certified disadvantaged small business. Cask offers clients a range of business and technology management services that enable organizations to achieve operational excellence. Cask’s experienced professionals work with customers to develop strategy, implement integrated solutions, and drive success. Cask provides end-to-end services and expertise across four primary practice areas: Enterprise Strategies and Solutions, Acquisition and Development Management, Value Network Management and Technology and Engineering Services.

Distributive Management and its DataDrill software will be an offering of Cask solutions, focused at program and project managers concerned with program and project performance. Project Management is the key element and foundation necessary to achieve desired results of any program, be it small scale or one that brings the complexity of enterprise level challenges. Critical decision factors include a reduction in time to identify and redirect efforts to realign with program initiatives, two strengths of DataDrill, which separate it from other commercial solutions. The ease in manipulation of data and use of performance metrics heighten the abilities of management and project leaders to foresee obstacles and determine measureable levels of achievement.

Immediate responsiveness to data provided by DataDrill enables users to proactively correct potential issues before the productivity of the project has been impacted. DataDrill offers project dashboards that clearly present project status, progress and performance, all customizable to meet any reporting requirements. The project management best practices library and custom templates are built in and active for immediate use. To properly support an intricate program, a measurement process should be deployed to ensure the performance of planning, periodic monitoring and execution results. Measurement establishes a transparent and uniform process for the success and health of your program.

About Distributive Management and DataDrill

Distributive Management is the leading provider of quantitative management and performance measurement solutions for use in projects and across the enterprise. Our metrics dashboard software, DataDrill, enables companies to more easily and more effectively implement measurement and dashboards in support of project management, performance reporting, process improvement and initiatives such as CMMI. DataDrill is being used in a wide range of industries, including defense, software/IT, technology, telecommunications, banking, and insurance. DataDrill’s customers include Arbitron, Boeing, BAE Systems, Booz Allen Hamilton, GEICO, GE, Hewlett Packard, Lockheed Martin, NASA, Northrop Grumman, Rockwell Automation, Raytheon, SAIC, and Spansion.
